## EXPERIENCE

### KOSTKITA

Backend Engineer – Remote (Freelance Project)

Bogor, ID  
Jan 2024 – Present

- Developed backend features for an online property booking app. **(PHP, Laravel, MySQL)**
- Implemented room availability, booking logic, integration with payment gateway, integration with Google SSO OAuth, user authentication system with JWT Auth.
- Designed and optimized database structure to handle property and customer data.
- Collaborated with the frontend developer to ensure smooth API integration.

### PT. CIPTA MUDA SOLUSI (Kementrian Koperasi & UMKM Indonesia)

Backend Engineer & Database Administrator - Internship

Jakarta, ID  
Aug 2024 – Jan 2025

- Worked as a backend engineer in Entrepreneur Hub (EHUB) Web Application. **(PHP, Laravel, MySQL)**
- Assisted in developing APIs and maintaining system modules using Laravel and MySQL
- Managed and optimized existing databases, exported database records to Excel files for reporting. **(Python, MySQL, Excel)**
- Developed a Google Drive-like file sharing system from scratch to store and share files with individuals or entire organizations (File Sharing).
- Collaborated with senior developers and other co-workers to ensure consistency between existing systems and new application development..

## PROJECT

### TASKMINDER

Fullstack Developer – Level Assessment Project for Grade 11 Advancement

Bogor, ID  
Feb 2024 – Jun 2024

- Served as Lead Developer, responsible for architecting and implementing the application.
- Collaborated with three other team members to plan the application's usability, target users, programming language, framework, SDLC type used for application development, and project timeline.
- Developed the application using Vue.js for the frontend and Laravel for the backend, leveraging MySQL as the relational database to ensure efficient data management and accelerate development. **(Javascript, PHP, Vue.JS, Laravel, MySQL)**
- Delivered the project on time and received positive feedback from test users.

### 11<sup>th</sup> Class Website Project

Backend Developer

Bogor, ID  
Nov 2023 – Dec 2023

- Responsible for providing and processing data to be displayed by the frontend. **(Javascript)**
- Collaborated with three team members to plan an attractive design for the class website and to collect and process relevant data for display.
- Successfully completed the project on time and received positive feedback and suggestions.
